people
working
here (C)

S4½ different grades or levels. Some includes some chief
some in between. Specializing certain techniques you only
work on certain aspects. This has to do w/ both profit &
efficiency + safety.. A few manager types oversee +
coordinate out of "labor" force.

one person

S4½ younger mustache, good-natured a little bit
"like" apprentice. Excited about job. Specialized has to
do w/ fitting, conversions, taking, "like" plumber but
more precise + specialized. Special area must be
allowed to be here. It privilege. A person gets certain
perks for being involved + the understanding is that
these are in return for closed-mouthedness. People here
know that if they're too careless about what they
say about their job, they not only get taken off
it, but lose their special benefits. Patriotic feel
- for the good of the "motherland". New development to
fit the plots of enemies of the homeland. Again
(impressions of nuclear engineering)

Words like induction, flux, impulsion, capacitors,
passive containment, closed systems. Factors of immense
Approved For Release 2003/01/09 : CIA-RDP96-00789R003400280002-3 power, channeled.

S4/2 Starts out low level but builds up to huge concentrated power ^{energy} levels that is all contained w/in the constraints of the Antag. & there can't be loads of material w/in it that are acted upon - "bombed" - but never leave the Antag. This ~~has~~ energy never seem to go anywhere or do anything else.

Developed

S4/2 Experimental, high tech, exciting for people involved, has some sort of significant applications for national strategic goals - not necessarily military, but also economic.
